TIMER MASTER SLAVE 4CH CONTROLLER

www.hdlautomation.com

Timer Master/Slave 4CH Controller

HDL KNX/EIB series products of timer is fully complying with European safety standards and KNX association protocol. High Performance EMC Filter is embedded, which fully complying the requests of EMC in Europe. This timer controller is embedded with RTC, can run real time itself, can used as master timer and slave timer.

Specifications

- Working Voltage: 21-30VDC
- BUS interface: KNX/EIB
- Current: <10mA

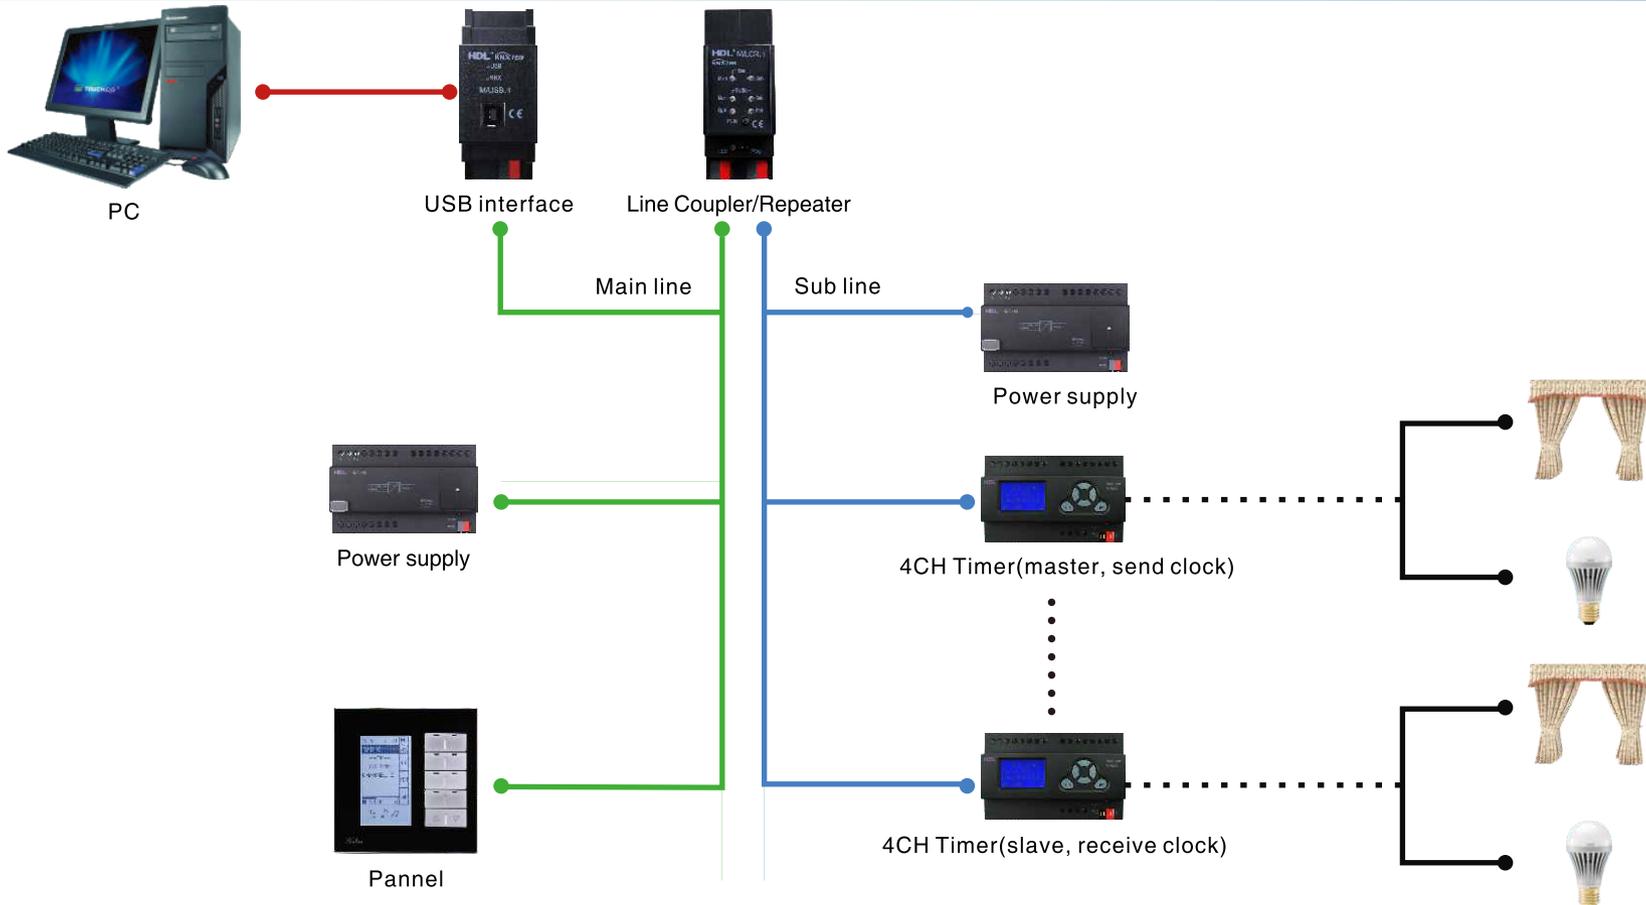

Features:

- Master timer and slave timer
- Year routine
- Month routine
- Week routine
- Day routine
- Special day
- Switch control
- Alarm control
- Shutter control
- Scene control
- Sequence control
- Percentage control
- Threshold control
- Voltage recovery
